

SERVICES AGREEMENT & SCOPE OVERVIEW

AI Masterclass for Teams

PREPARED FOR	PREPARED BY
Dhouha Ali Ben Gouider KOJ INTERIORS	Zkandar L.L.C

Program Overview

Foundations and core approach

The AI Masterclass for Teams is a high-impact, hands-on, studio-first training program designed specifically to help interior design, architecture, and creative teams seamlessly integrate Artificial Intelligence into real-world creative workflows.

The program is meticulously tailored around KOJ Interiors' unique workflow structure, project typologies, creative direction, and operational pain points. The core objective is to move beyond theory and build practical, repeatable systems that allow teams to:

- Compress concept-to-presentation timelines exponentially.
- Elevate creative output quality and visual depth.
- Develop stronger, more cohesive emotional storytelling capabilities.
- Increase cross-departmental workflow alignment and efficiency.
- Build permanent, scalable AI knowledge systems for daily studio operations.

Rather than generalized instruction, sessions combine live demonstrations, intensive hands-on exercises, real project simulations, prompt engineering frameworks, custom image workflows, and collaborative implementation challenges.

Program Structure

Delivery formats and specs

DURATION	2-Day Masterclass (in-studio sessions) + 3rd Day Dedicated Support (scheduled post-masterclass, focused strictly on troubleshooting and implementation follow-up).
DELIVERY FORMAT	In-Person, directly at your design studio.
TEAM CAPACITY	Up to 20 Participants.
SESSION STYLE	Highly interactive, hands-on application paired with on-screen visual presentation.
RECOMMENDED AUDIENCE	Architects, Interior Designers, FF&E Teams, Visualization Teams, Design Directors, Creative Leads, Marketing Teams, and Concept Development Teams.

All services are governed by our standard terms available at zkandar.com/terms.

Scope of the Masterclass

The curriculum covers six core pillars, meticulously structured to build advanced AI capability from foundational principles to complex creative execution

MODULE 01

AI Landscape & Tool Ecosystem

A structured breakdown of the current global AI ecosystem, navigating noise to identify exactly which specialized tools should be deployed for specific design and commercial tasks.

Key Topics: Text tools vs. image tools vs. video tools • AI workflow mapping • Strategic tool selection frameworks

MODULE 02

Claude Fundamentals & Prompt Craft

A deep dive into advanced cognitive computing with Claude. Teams learn to structure complex AI conversations using context engineering, persistent environments, and bespoke prompt frameworks.

Key Topics: Context engineering • Claude Projects architecture setup • Prompt structure frameworks • Feeding complex presentations, PDFs, references, and project documents • Creating persistent workflow environments

MODULE 03

AI Image Generation Workflows

Practical, production-grade image-generation systems tailored for rapid architectural concept creation, spatial ideation, and pristine design visualization.

Key Topics: Nano Banana + Cinematic rendering workflows • Multi-tool comparison frameworks • Prompt quality guardrail systems • MaterialScaping & Moodboard creation • Iterative output refinement

MODULE 04

FF&E Development

Live, studio-specific case studies showing how to guide generative AI to conceptualize, iterate, and ground bespoke custom furniture, fixtures, and equipment designs.

Key Topics: Bespoke object creation • Furniture ideation systems • Spatial placement workflows • Contextual rendering systems

MODULE 05

The Art of Storytelling

Exploring AI as a powerful narrative and cinematic medium to create emotionally-driven project pitches, immersive presentations, and brand-specific visual identities that win client buy-in.

Key Topics: Narrative-driven image generation • Creating unique fingerprint precedents • Cinematic short film creation • AI storytelling frameworks • Emotional sequencing & atmosphere building • Brand-focused marketing asset generation • Client immersion • Storyboarding & scene composition

MODULE 06

Prize Money Competition

To ensure practical retention, participants collaborate in small cross-functional groups to tackle live project briefs under timed conditions, synthesizing every tool learned into real studio deliverables.

Key Topics: High-fidelity Moodboards • Customized FF&E Concepts • Structured Narratives • AI-generated technical Consultant Briefs

What's Included

- Tailored Content: Custom studio-specific case studies mapped directly to your design aesthetic.
- Hands-On Exercises: Real-time, in-session supervised practice to ensure tool mastery.
- Gamified Learning: Live team competition and high-engagement collaborative exercises.
- Lifetime Learning Assets: Unlimited access to session recordings for internal training updates.
- Resource Kits: Free proprietary E-prompt books, system templates, and structural resources.
- Community Access: 60-day open entry into our exclusive professional AI community.
- Post-Masterclass Support: Dedicated 3rd-day troubleshooting session to refine active pipelines.
- Performance Metrics: Data-driven team performance analysis provided back to leadership.

Expected Outcomes

By the conclusion of this intensive program, the KOJ Interiors team will be equipped to:

- Flawlessly integrate production-ready AI systems into daily studio workflows.
- Drastically compress concept development timelines, protecting creative margins.
- Elevate client storytelling, pitching, and overall visual communication standards.
- Generate significantly higher-quality creative concepts at unprecedented speeds.
- Standardize repeatable AI workflows across individual design and marketing departments.
- Build absolute operational confidence presenting and explaining AI-assisted work to clients.

Commercial Terms

Payment Terms: Full payment is required strictly in advance to officially secure the engagement, reserve the calendar dates, and initiate the comprehensive Masterclass customization and structuring phase.

** Customization and Prep Phase: Requires 2-3 weeks from receipt of payment.*

Next Steps

To finalize scheduling and commence customization, the following operational steps apply

- 1 **Tax Documentation:** Retrieval of your Tax Certificate to issue the official commercial invoice.
- 2 **Alignment Call:** A structural logistics and alignment call will be scheduled with leadership.
- 3 **Onboarding:** Confirming final team structure and participating departments to onboard them onto the digital dashboard.

About Zkandar L.L.C

ZKANDAR L.L.C is a premier EdTech company and strategic consultancy focused entirely on AI integration within the creative industries. Founded by Khaled Iskandar—an Architect and Interior Designer turned AI Educator and Workflow Strategist—the company specializes in helping architecture, interior design, and marketing teams fundamentally rethink how ideas are developed, visualized, communicated, and executed through sophisticated AI-driven systems.

The company brings a wealth of specialized industry knowledge, having successfully delivered high-level talks, advanced workshops, and corporate masterclasses for prestigious design firms and cultural institutions globally, including SOM, LW Design Group, Sikka Festival, Dubai Institute of Design & Innovation (DIDI), and more.
