01 Program Overview

The AI Masterclass for Teams is a high-impact, hands-on, studio-first training program designed specifically to help architecture, interior design, and marketing teams seamlessly integrate Artificial Intelligence into real-world creative workflows. The program is meticulously tailored around the client's unique workflow structure, project typologies, creative direction, and operational pain points. The core objective is to move beyond theory and build practical, repeatable systems for daily studio operations.

CORE OBJECTIVES

- **Compress** concept-to-presentation timelines exponentially.
- **Elevate** creative output quality and visual depth.
- **Develop** stronger, more cohesive emotional storytelling capabilities.
- **Increase** cross-departmental workflow alignment and efficiency.
- **Build** permanent, scalable AI knowledge systems for daily studio operations.

02 Program Structure

DURATION	2 Live Sessions · 15 Hours total + 3rd dedicated post-implementation troubleshooting session (later date)
DELIVERY FORMAT	In-Person, directly at your design studio
TEAM CAPACITY	Up to 20 Participants
SESSION STYLE	Highly interactive, hands-on application + on-screen visual presentation
RECOMMENDED AUDIENCE	Architects, Interior Designers, FF&E Teams, Visualization Teams, Design Directors, Creative Leads, Marketing & Concept Development Teams

All services are governed by our standard terms available at zkandar.com/terms.

03 Scope of the Masterclass

The curriculum covers seven core pillars, meticulously structured to build advanced AI capability from foundational principles to complex creative execution.

PILLAR 01 AI LANDSCAPE & TOOL ECOSYSTEM

A structured breakdown of the current global AI ecosystem, navigating noise to identify exactly which specialized tools should be deployed for specific design and commercial tasks.

KEY TOPICS — Text vs. image vs. video tools · AI workflow mapping · Strategic tool selection frameworks.

PILLAR 02 CLAUDE FUNDAMENTALS & PROMPT CRAFT

A deep dive into advanced cognitive computing with Claude. Teams learn to structure complex AI conversations using context engineering, persistent environments, and bespoke prompt frameworks.

KEY TOPICS — Context engineering · Claude Projects architecture · Prompt structure frameworks · Feeding presentations, PDFs & references · Persistent workflow environments.

PILLAR 03 TECHNICAL SPECIFICATION REVIEW WORKFLOWS

Utilizing language model intelligence to instantly cross-examine detailed technical specifications against existing corporate standards, localized building codes, and historical references.

KEY TOPICS — Multi-document cross-referencing · Highly structured review outputs · AI-assisted discrepancy & risk detection.

PILLAR 04 AI IMAGE GENERATION WORKFLOWS

Practical, production-grade image-generation systems tailored for rapid architectural concept creation, spatial ideation, and pristine design visualization.

KEY TOPICS — Nano Banana + Cinematic rendering · Multi-tool comparison frameworks · Prompt guardrail systems · MaterialScaping & Moodboards · Iterative refinement.

03 Scope — Continued

PILLAR 05 FF&E DEVELOPMENT

Live, studio-specific case studies showing how to guide generative AI to conceptualize, iterate, and ground bespoke custom furniture, fixtures, and equipment designs.

KEY TOPICS — Bespoke object creation · Furniture ideation systems · Spatial placement workflows · Contextual rendering systems.

PILLAR 06 THE ART OF STORYTELLING

Exploring AI as a powerful narrative and cinematic medium to create emotionally-driven project pitches, immersive presentations, and brand-specific visual identities that win client buy-in.

KEY TOPICS — Narrative-driven generation · Fingerprint precedents · Cinematic short films · Emotional sequencing & atmosphere · Brand marketing assets · Client immersion · Storyboarding & scene composition.

PILLAR 07 PRIZE MONEY COMPETITION

To ensure practical retention, participants collaborate in small cross-functional groups to tackle live project briefs under timed conditions, synthesizing every tool learned into real studio deliverables.

DELIVERABLES — High-fidelity Moodboards · Customized FF&E Concepts · Structured Narratives · AI-generated technical Consultant Briefs.

04 What's Included & Outcomes

WHAT'S INCLUDED

- **Tailored Content:** custom studio-specific case studies mapped to your aesthetic
- **Hands-On Exercises:** real-time supervised practice for tool mastery
- **Gamified Learning:** live team competition & collaborative exercises
- **Lifetime Assets:** unlimited access to session recordings
- **Resource Kits:** proprietary E-prompt books, system templates & resources
- **Community Access:** 60-day entry to our professional AI community
- **Post-Masterclass Support:** bonus 3-hour troubleshooting session
- **Performance Metrics:** data-driven team analysis for leadership

EXPECTED OUTCOMES

- Flawlessly integrate production-ready AI systems into daily workflows
- Drastically compress concept development timelines, protecting margins
- Elevate client storytelling, pitching & visual communication standards
- Generate significantly higher-quality concepts at unprecedented speeds
- Standardize repeatable AI workflows across design & marketing departments
- Build absolute operational confidence presenting AI-assisted work to clients

05 Commercial Terms

TOTAL ENGAGEMENT INVESTMENT

AED 120,000

All-inclusive studio engagement

PAYMENT TERMS

Full payment is required strictly in advance to officially secure the engagement, reserve the calendar dates, and initiate the comprehensive Masterclass customization and structuring phase. The customization and prep phase requires 2–3 weeks from receipt of payment.

06 Next Steps

1 Tax Documentation

Retrieval of your Tax Certificate to issue the official commercial invoice.

2 Alignment Call

A structural logistics and alignment call will be scheduled with leadership.

3 Onboarding

Confirming final team structure and participating departments to onboard them onto the digital dashboard.

07 About Zkandar L.L.C

ZKANDAR L.L.C is a premier EdTech company and strategic consultancy focused entirely on AI integration within the creative industries. Founded by Khaled Iskandar — an Architect and Interior Designer turned AI Educator and Workflow Strategist — the company specializes in helping architecture, interior design, and marketing teams fundamentally rethink how ideas are developed, visualized, communicated, and executed through sophisticated AI-driven systems.

Trusted by leading design firms & cultural institutions globally — **SOM · LW Design Group · Sikka Festival · Dubai Institute of Design & Innovation (DIDI)** & more.
